

# CallRptDescription

This function returns the full description of a Call Report concept line based on the provided concept code. The source for this data is the G&B Call Report program (not the G&B GL program).

## CallRptDescription(Concept)

## Example Usage

- `=CallRptDescription("RCON0010")` Returns the description for concept RCON0010.

## Required Parameters

### Concept

The 8-character alphanumeric Call Report concept code.

```
"RCON0010"  
"RIAD4107"
```

%fingerprint{Used in: [CallRptDescription](#), [CallRptValue](#)}%
