

FedRptDescription

This function returns the full description of a Federal Report line based on the Federal Report name and line number. If called without the line number, it returns the full description of the report.

```
%InlineCode{FedRptDescription(RptName, LineNum)}%
```

Example Usage

- %InlineCode{=FedRptDescription("TFR")}% Returns the full description for the TFR Federal Report.
- %InlineCode{=FedRptDescription("TFR", "SC26")}% Returns the description for line SC26 of the TFR Federal Report.

Required Parameters

RptName

The name of the federal report (not its description)

```
"Call"  
"TFR"
```

```
%fingerprint{Used in: FedRptAvgBal, FedRptBalance, FedRptBudget, FedRptDescription}%
```

Optional Parameters

LineNum

The abbreviated federal report line number.

```
"SC11"  
"S0141"  
"RI-4435"
```

```
%fingerprint{Used in: FedRptAvgBal, FedRptBalance, FedRptBudget, FedRptDescription}%
```
