FedRptDescription

This function returns the full description of a Federal Report line based on the Federal Report name and line number. If called without the line number, it returns the full description of the report.

FedRptDescription(RptName, *LineNum*)

Example Usage

- **=FedRptDescription("TFR")** Returns the full description for the TFR Federal Report.
- **=FedRptDescription("TFR", "SC26")** Returns the description for line SC26 of the TFR Federal Report.

Required Parameters

RptName

The name of the federal report (not its description)

```
"Call"
"TFR"
```

%fineprint{Used in: FedRptAvgBal, FedRptBalance, FedRptBudget, FedRptDescription}%

Optional Parameters

LineNum

The abbreviated federal report line number.

```
"SC11"
"S0141"
"RI-4435"
```

%fineprint{Used in: FedRptAvgBal, FedRptBalance, FedRptBudget, FedRptDescription}%
