

Parameters

This page provides a description of all of the parameters that are used throughout the GL functions in Excel.

To Quote or not to Quote

- Use quotes if you are using the **actual** data in the formula:
`%InlineCode{=Balance("SC11","12/31/2009")}%`
- Don't use quotes if you are **referring** to the cell that holds the data:
`%InlineCode{=Balance(A1,B1)}%`
 - Cell A1 would then contain `%InlineCode{SC11}%` **not** `%InlineCode{"SC11"}%`
 - Cell B1 would then contain `%InlineCode{12/31/2009}%` **not** `%InlineCode{"12/31/2009"}%`

Please note that all examples given on this page show quoted data, as would be used if the values were directly entered into the formula. However, it is generally better practice to enter the data in cells of their own and refer to those cells from within the formulas.

AcctNum

The GL account number or TFR line number. This must include any applicable company abbreviations.

```
"1010-000"  
"1010-000CSB"  
"SC110"  
"S011"
```

`%fingerprint{Used in: AvgBal, Balance, Budget, Description}%`

AvgBalDate

The date that represents the **month and year** for which to compute the daily average balance (when used **without** the optional `StartDate` parameter).

```
"3/31/2009"    Returns the daily average balance for 3/1/2009 through  
3/31/2009, inclusive  
"3/1/2009"    Returns the daily average balance for 3/1/2009 through  
3/31/2009, inclusive  
"3/17/2009"   Returns the daily average balance for 3/1/2009 through  
3/31/2009, inclusive
```

The date that represents the month and year **through** which to compute the daily average balance

(when used **with** the optional StartDate parameter).

"3/31/2009", with StartDate of 1/1/2009 for 1/1/2009 through 3/31/2009, inclusive	Returns the daily average balance
"3/1/2009", with StartDate of 1/31/2009 for 1/1/2009 through 3/31/2009, inclusive	Returns the daily average balance
"3/17/2009", with StartDate of 1/12/2009 for 1/1/2009 through 3/31/2009, inclusive	Returns the daily average balance

%fineprint{Used in: [AvgBal](#), [FedRptAvgBal](#), [LineAverage](#), [LineAverageRound](#)}%

BalanceDate

The date used to retrieve account balances from the General Ledger. End of year closeout transactions are posted as of 6:00 PM on December 31. A balance date of 12/31 will return balances for income and expense accounts, while a balance date of 12/31 8:00PM will return zero for all income and expense accounts and reflect an accurate year-end close out equity fund balance.

"1/31/2009"	Account balances as of the end of the day on January 31, 2009
"12/31/2009"	Account balances prior to posting the year-end close out batch (ie, income + expense > 0)
"12/31/2009 8:00 PM"	Account balances after posting the year-end close out batch (ie, income + expense = 0)

%fineprint{Used in: [Balance](#), [FedRptBalance](#), [LineBalance](#), [LineRound](#)}%

BudgetDate

The date that represents the **month and year** used to retrieve the budget numbers

"3/31/2009"	Returns the budget for March 2009
"3/1/2009"	Returns the budget for March 2009
"3/17/2009"	Returns the budget for March 2009

%fineprint{Used in: [Budget](#), [FedRptBudget](#), [LineBudget](#), [LineBudgetRound](#)}%

ColDate

The date of the user report column created by going to Edit Columns from the Edit User Report form in the General Ledger. The date must be manually added in the General Ledger in order for it to work in the Excel function.

```
"12/31/2009"  
"5/31/2009"
```

%fineprint{Used in: [LineColumn](#)}%

ColName

Name of the user report column created by going to Edit Columns from the Edit User Report form in the General Ledger. The column must be manually added in the General Ledger in order for it to work in the Excel function.

```
"AVG BAL"  
"QTD Average Balance"  
"YTD Avg Bal (Month End Adjusted)"
```

%fineprint{Used in: [LineColumn](#)}%

Company

The company suffix code used to restrict user report numbers to a single company. To include all companies, either 1) do not enter anything for this parameter or 2) use the abbreviation "Con" (for Consolidated). To include only the default Citizens company, use either 1) double quotes with nothing inside: "" or 2) the abbreviation "Cit" (for Citizens).

"Con"	Consolidated
""	Citizens Savings Bank
"Cit"	Citizens Savings Bank
"CSA"	CSA Services, LLC
"CSB"	CSB Services, Inc.

%fineprint{Used in: [FedRptAvgBal](#), [FedRptBalance](#), [FedRptBudget](#), [LineAverage](#), [LineBalance](#), [LineBudget](#)}%

Concept

The 8-character alphanumeric Call Report concept code.

```
"RCON0010"  
"RIAD4107"
```

%fineprint{Used in: [CallRptDescription](#), [CallRptValue](#)}%

LineCode

The 3-digit user report line item code.

```
"A01"  
"C15"
```

%fineprint{Used in: [LineAverage](#), [LineAverageRound](#), [LineBalance](#), [LineBudget](#), [LineBudgetRound](#), [LineColumn](#), [LineDescription](#), [LineRound](#)}%

LineNum

The abbreviated federal report line number.

```
"SC11"  
"S0141"  
"RI-4435"
```

%fineprint{Used in: [FedRptAvgBal](#), [FedRptBalance](#), [FedRptBudget](#), [FedRptDescription](#)}%

PosNeg

Limit results to **P**ositive, **N**egative, **D**ebit, or **C**redit only. You may spell out or abbreviate Positive, Negative, Debit, and Credit if you would like to make your formula more readable; the function performs a match on the first character only.

When evaluating numeric formulas such as SUM, Excel treats text as 0. This makes it possible to use this PosNeg parameter to include results of GL formulas in your other Excel formulas only in specific circumstances.

```
"P" Show balance only if positive, otherwise display:      Neg Balance  
"N" Show balance only if negative, otherwise display:      Pos Balance  
"D" Show positive number if debit balance, otherwise display:  Credit  
Balance  
"C" Show positive number if credit balance, otherwise display: Debit Balance
```

%fineprint{Used in: [AvgBal](#), [Balance](#), [FedRptAvgBal](#), [FedRptBalance](#), [LineAverage](#), [LineAverageRound](#), [LineBalance](#), [LineRound](#)}%

RptDate

The month-end date that corresponds to the respective Call Report reporting period. Data must exist in the G&B Call Report program in order for a given date to return values.

```
"12/31/2013"  
"1/31/2013"
```

%fingerprint{Used in: [CallRptValue](#)}%

RptName

The name of the federal report (not its description)

```
"Call"  
"TFR"
```

%fingerprint{Used in: [FedRptAvgBal](#), [FedRptBalance](#), [FedRptBudget](#), [FedRptDescription](#)}%

StartDate

The date that represents the month and year **from** which to compute the daily average balance (used only with the required AvgBalDate parameter).

"1/1/2009", with AvgBalDate of 3/31/2009 for 1/1/2009 through 3/31/2009, inclusive	Returns the daily average balance
"1/31/2009", with AvgBalDate of 3/1/2009 for 1/1/2009 through 3/31/2009, inclusive	Returns the daily average balance
"1/17/2009", with AvgBalDate of 3/12/2009 for 1/1/2009 through 3/31/2009, inclusive	Returns the daily average balance

%fingerprint{Used in: [AvgBal](#), [FedRptAvgBal](#), [LineAverageRound](#)}%

UserRpt

The name of the user report (not its description)

```
"BALCON"  
"INCST2"
```

%fingerprint{Used in: [LineAverage](#), [LineAverageRound](#), [LineBalance](#), [LineBudget](#), [LineBudgetRound](#), [LineColumn](#), [LineDescription](#), [LineRound](#)}%
