

# PlayGround

UNC paths will auto-format to links: (\\dc1\syse)  
unless we tell it not to using nowiki tags:  
\\dc1\syse

```
' '<nowiki>\\dc1\syse</nowiki>' '
```

## BLUF

Bottom line up front. Follow these steps:

1. Get key steps to remember
2. Put them in ordered list format
3. Float that list in upper right of page

## Syntax Reminders

This text<sup>1)</sup> needs a reference.

Wrap text in two single-quotes before and after to force "fixed-width font": `fixed-width font`. Fixed width text is easier to copy and paste than variable width fonts. Thus, filenames and other text we're likely to want to select should be entered with the fixed-width font.

Here's a block of VBA code (added via `<code vb></code>`):

```
Public Sub HelloWorld()  
    Debug.Print "Hello, world!"  
End Sub
```

Here's some keyboard keys: `Ctrl` + `C` to copy

This is `some highlighted text`. Some `important text`. Full [Wrap plugin examples](#).

Here's a useful tip that doesn't really flow with the rest of the article. It's automatically

indented 5% (by virtue of having a width of 90% and being centered).

There is a hidden comment in the source text for this line. It's added like this:

```
<wrap hide>hidden comment</wrap>
```

<sup>1)</sup>

this is a footnote
