

Address changes not appearing on Assessment Reports

Question

I'm having issues with changes of address not appearing on my Assessment Reports.

I made several changes on 7/15/2015, the changes appear under the "Changes" button for each account, are checked to report changes, but when I pull up an Assessment Report that includes the date of the changes – the changes do not appear on the report.

Answer

It turns out the tax collector's changes were on subsequent pages of her change report. There was only a single change shown on Page 1 (a change to a Township bill). The changes to the school bills were on pages 2-4.

The important thing to note here is that changes to school bills don't appear on the same page as changes to municipal bills. **Make sure you check all pages of the report to see every change.**
